Executive Summary

This document reports the different Articles, Workshops, Tutorials and Scientific Sessions where members of the consortium have presented results or background of the SUPER project as part of the project dissemination activities. Dissemination has been carried on through different channels including financial papers, conferences, industry events, standardization symposiums and tutorials. These activities have been performed in more than 10 countries all over the world located in Europe, America and Asia.

1 Introduction

Dissemination of the results and technologies of the SUPER project has been carried on by the consortium through different channels. In this document we briefly present the dissemination activities undertaken so far including the date, the responsible partner, information about the dissemination medium (e.g., conference, paper, etc) and the location where it took place. We next depict the geographical distribution of the dissemination activities and we finally include a last section with links to some of dissemination material generated so far.

2 Activities

The activities presented in the remainder of this section are divided in seven main groups. First, we present the different articles describing the results of SUPER. Secondly, we mention the different keynotes or invited talks where results from the project were presented. Next, we report on the different project workshops organised so far. We include as well technical sessions and industry events about the research undertaken in SUPER. Finally, we mention the tutorials about SUPER technologies organised all over the world and the workshops where results of the project were discussed.

3 Geographical Distribution of Dissemination Activities

In this section we present graphically the geographical distribution of the dissemination activities undertaken so far. For this we include three maps localizing the activities reported in the previous section where members of the consortium were present, and we include the date and the actual venue. Figure 1 shows the dissemination activities that took place in 22 cities in 10 European countries. Figure 2 localizes the dissemination activities that took place in Asia and finally Figure 3 shows those that were located in America.
